

choice: We can allow the Middle East to continue on the course that led to September the 11th, and a generation from now, our children will face a region dominated by terrorist states and radical dictators armed with nuclear weapons. Or we can stop that from happening by rallying the world to confront the ideology of hate, by supporting the forces of liberty and moderation in the region, and by helping give the people of the Middle East a future of hope. And that is the choice America has made.

The path to victory will be uphill and uneven, and it will require more patience and sacrifice from our Nation. Yet we can be confident of the outcome, because America will not waver and because the direction of history leads toward freedom.

Thank you for listening.

NOTE: The address was recorded at 9:55 a.m. on August 31 at the Grand America Hotel in Salt Lake City, UT, for broadcast at 10:06 a.m. on September 2. The transcript was made available by the Office of the Press Secretary on September 1 but was embargoed for release until the broadcast. The Office of the Press Secretary also released a Spanish language transcript of this address.

Remarks on Labor Day in Piney Point, Maryland

September 4, 2006

The President. Thank you all. Please be seated. Happy Labor Day.

Audience members. Happy Labor Day.

The President. Yes, thanks. Listen, I'm thrilled that Michael invited me to come and visit with you this Labor Day. But this isn't the first time he invited me. *[Laughter]* He invited me for last year, and I committed. And then we had a terrible storm hit, and I hope you understood—understand why I needed to be there than up here last year.

Now he invited me again. And I couldn't wait to say yes and couldn't wait to come here. I must confess, Michael, I didn't realize how strong your facility—facilities are here. I wasn't sure what to expect, but this is a fantastic facility. It speaks to your leadership and the leadership and the importance of your union. And so here on Labor Day, I

say to the union members who are here, happy Labor Day, and thanks for supporting leadership that is progressive, smart, capable, and has your best interests at heart.

I'm proud to be here with the family members. Michael, thanks for inviting family members. As you know, I think family is an important part of life, and that—invite the family here—families here today was a smart thing to do. And I look forward to shaking as many hands as I can this morning.

Today on Labor Day, we honor those who work, and we honor those who work because, in so doing, we recognize that one of the reasons why we're the economic leader in the world is because of our workforce. And the fundamental question facing the country is, how do we continue to be the economic leader in the world? What do we do to make sure that when people look around the world next year and 10 years from now, they say, "The United States is still the most powerful economy in the world"? I think that's an important goal to have, because when we're the most powerful economy in the world, it means our people benefit. It means there's job opportunities. That's what we want. We want people working. We want people to realize their dreams.

And so the best thing to do is to keep progrowth economic policies in place as the first step to making sure we're the most powerful economy in the world. And I think that means keeping those taxes low, letting you keep more of your own money. See, when you have more money in your pocket, you get to spend the money. You get to make the decisions. And the fundamental question facing Government is, who best to spend your money, you or the Government? I believe you ought to do it.

So we ought to make the tax relief permanent. I like it when people are working for a living, having more after-tax money in their pocket. That's what I like. And I think that ought to be a policy of the United States Government. So to make sure that we're the economic leader of the world, we got to keep taxes low.

But we also got to do some other things that's smart, and it starts with making sure

our workers have the skills necessary to compete in the 21st century. And that's one of the primary reasons I came to this facility.

Now, I just happened to be over here at the training building, and they put me behind the wheel of a Coast Guard cutter in Baltimore Harbor, and they made the boat rock a little bit. *[Laughter]* And I got slightly discombobulated. *[Laughter]* It's one of the most amazing training tools I have ever seen. But it shows this union's commitment, along with industry's commitment, to making sure that those who pilot the boats, those who are engineers on the boats, have the absolute best training possible. See, as we constantly—as the world constantly changes, we better make sure that our workforce has the skills necessary to compete if we want to be the world's leading economy.

And so I applaud the Seafarers Union, and I applaud the employers working together to make sure that those who work for a living have what it takes to be competitive. And we got to make sure that's the case throughout all the workforce. And we got to make sure that our community colleges are accessible to people who need to gain new skills of the 21st century. See, as the workforce stays productive—in other words, if you keep getting a good education, it increases your standard of living, but also helps this country remain strong economically.

A couple of other things we need to do as well. We got to do something about energy in order to make sure that we're competitive, that this economy will remain strong, that people are able to find work. By the way, the unemployment rate is 4.7 percent. That's a good sign if you're somebody looking for a job. It means people are working here in the United States.

But one thing is clear, is that dependence on foreign oil jeopardizes our capacity to grow. I mean, the problem is, we get oil from some parts of the world and they simply don't like us. And so the more dependent we are on that type of energy, the less likely it will be that we are able to compete and—so people have good, high-paying jobs.

And so I've got a plan to work with—to spend money on technologies. See, the technological development here at this school has been dramatic. Well, we can achieve the

same technological breakthroughs when it comes to energy. And that starts with how we drive our automobiles. You know, one of these days, you're going to have a—batteries in your automobile that will enable you to drive the first 40 miles without gasoline, and your car doesn't have to look like a golf cart. *[Laughter]* I mean, I bet the people down in this part of the world like to drive pickups, Mike. *[Laughter]* But we're going to have a battery that makes those pickups go.

And the reason why is, is that we're spending money to develop new technologies to enable us to become less dependent on oil. And that makes sense. And so in order to think about how we remain competitive as a nation, we've got to be aggressive in promoting new technologies, particularly on the energy front.

You know, in the Midwest, a lot of people are beginning to fuel their cars with more and more ethanol. Ethanol is derived from corn. So you've got to get out there growing corn. The corn goes into an ethanol plant, and out comes fuel to drive the car. That seems to make a lot of sense to me, to say, in order to become less dependent on foreign oil, why don't we become more reliant upon America's farmers to produce energy for our automobiles. And that's the kinds of things we're doing.

You know, we flew over—coming here, we flew over a nuclear powerplant, and it's a modern, safe plant. In my judgment, this country ought to continue to expand nuclear power if we want to become less dependent on foreign sources of energy. Nuclear power is safe; nuclear power is clean; and nuclear power is renewable. And so what I'm telling you is, and what I want the country to understand is, is that technologies has enabled this workforce, this union to become—have a more productive workforce; technology is going to enable us to become less dependent on oil. And we've got to continue to pursue technologies.

And finally, one of the ways to make sure that we're a competitive nation is to continue opening up markets for U.S. products. If I was somebody who was driving a ship or an engineer on a ship, I'd want to hear a President say, "We want you to be selling U.S. products—transporting U.S. products

around the world.” See, we’ve got 5 percent of the world’s people here in the United States, which means 95 percent are potential customers. And therefore, it’s important for us to be aggressive about opening up markets.

And my message to the world is this: Just treat us the way we treat you. That’s all we expect. We just want the rules to be fair—because I believe this country can compete with anybody, anytime, anywhere, so long as the rules are fair.

So Mike asked me to come and talk about ways to make sure we’re competitive. He said, “What are you going to do, Mr. President? There you are; things are going okay now, but what about 5 years from now; what will the world look like?” And I hope here are some good ideas for you to think about, about how to make sure that the United States is competitive.

In the meantime, it’s important for Presidents to embrace the Jones Act. Sacco’s constantly talking to me about that. I have, so far, 5½ years as the President, supported the Jones Act and will continue to do so as the President.

I can’t help but look at a man over there in uniform and think about our military right now on Labor Day. First, thank you for serving. And our soldiers and sailors and Coast Guard men and marines and Air Force have got to understand this—that this country supports them in the mission; that they may hear all the political discourse going on, but the people of this country, the people of the United States of America stand squarely behind the men and women who wear our uniform. And on Labor Day, we think about those who are sacrificing for our freedom and peace, and we think about their families too.

And so I want to thank you for greeting me. I look forward to coming to say hello to you. I appreciate you taking time out of your day to say hi. I know you’re a little disappointed that Laura didn’t come. [*Laughter*] You probably wish she’d have come and I stayed at home. [*Laughter*] But she sends her greetings. God bless you all, and may God continue to bless the United States of America.

NOTE: The President spoke at 11:38 a.m. at the Paul Haul Center for Maritime Training and Education. In his remarks, he referred to Michael Sacco, president, Seafarers International Union of North America, AFL–CIO.

Memorandum on Transfers of Defense Articles and Services in Support of Sudan Security Sector Transformation (SST) Program

August 28, 2006

Presidential Determination No. 2006–22

Memorandum for the Secretary of State

Subject: Transfers of Defense Articles and Services in Support of Sudan Security Sector Transformation (SST) Program

Pursuant to the authority vested in me by the Constitution and laws of the United States, including section 40(g) of the Arms Export Control Act (AECA), I hereby:

- Determine that the transaction, encompassing transfers of defense articles and services, funded by United States Government assistance, necessary for an SST program for the Government of Southern Sudan that will support transformation of the Sudan People’s Liberation Army from a guerrilla force into a smaller, conventional force is essential to the national security interests of the United States. Such transfers include the provision of vehicles and communications equipment; power generation; facilities construction/renovation; training and technical assistance; recommendations for force structure, training, equipment, infrastructure, and resource management; and other defense articles and services in support of military reform in Southern Sudan, including support to the Sudan People’s Liberation Movement;
- Waive the prohibitions in section 40 of the AECA related to such transaction; and
- Assign to you the functions under section 40(g)(2) of the AECA to consult with and submit reports to the Congress
